Nagpur, Maharashtra, India

SUMMARY

MERN Stack Developer with 3 years of experience building scalable SaaS platforms, workflow automation systems, and production-grade backend architectures. Skilled in Node.js, React.js, MongoDB, AWS S3, Docker, subscriptions, payment systems, RBAC, and microservices with strong focus on scalable APIs and business-driven solutions.

WORK EXPERIENCE

Software Developer – Morpheo Digital, Noida

May 2025 – Present

- Engineered backend architecture for a subscription-based milk delivery platform with automated recurring orders, delivery scheduling, multi-role authentication, Razorpay, AWS S3, and FCM notifications.
 - Optimized delivery scheduling workflows, reducing operational overhead and supporting scalable daily subscription processing.
 - Built a Patwari-focused document automation platform that dynamically extracts fields from PDF/DOC templates and auto-generates government forms like Mritak Namantaran using user-provided data.
 - Implemented subscription and pay-per-form monetization systems with OTP authentication, RBAC, Dockerized deployment, and AWS S3 integration.
 - Developed Jira-style collaboration modules including workspace management, task assignment, invitations, comments, activity tracking, and role-based workflows.
 - Worked in Agile/Jira sprint environments, delivering scalable APIs, backend optimizations, and production deployments.
-

SDE-I (MERN) – Applore Technologies, Noida

May 2024 – May 2025

- Developed and deployed full-stack features using MERN + Nest.js across multiple projects.
 - Debugged and optimized existing modules, improving backend response time and reliability.
 - Delivered features end-to-end — from API design to UI integration and deployment.
 - Played an integral role in developing multiple web applications from inception to deployment.
-

Full Stack Developer – EightyFive Technologies Pvt. Ltd., Goa
Jul 2023 – May 2024

- Developed and maintained back-end applications using Node.js, Express.js, and MongoDB.
- Managed the administrative dashboard for real estate and cryptocurrency exchange initiatives.
- Built Node.js + Express APIs and admin dashboards for crypto & real-estate products.
- Implemented CRUD admin flows in React and improved backend performance.
- Optimized existing code and managed both front-end and back-end aspects of the development process.

CORE SKILLS

Category	Technologies & Tools
Backend	Node.js, Express.js, Nest.js, RESTful APIs, GraphQL (basic), WebSockets, Cron Jobs, Microservices
Frontend	React.js, Next.js, Material-UI, React-Bootstrap, HTML5, CSS3, Redux, Context API
Database	MongoDB, Prisma ORM, MySQL (basic), Mongoose, Redis (for caching & pub/sub)
Cloud & DevOps	AWS S3, EC2, CloudFront, Firebase Cloud Messaging (FCM), Docker, Nginx, PM2, GitHub Actions (CI/CD)
Payments & Integrations	Razorpay, JWT Authentication, OAuth 2.0, Google Maps API, Twilio (SMS/OTP), Nodemailer (SMTP), PDFKit, ExcelJS

EDUCATION

C-DAC, MET Mumbai – PG Diploma in Advanced Computing | *Sep 2022 – Mar 2023* | GPA: 74%

Goa College of Engineering, Ponda – B.E. in Mining Engineering | *Apr 2015 – Aug 2018* | GPA: 69.19%
