SUMMARY

Backend-focused Full Stack Engineer with 3 years of experience building production SaaS platforms, workflow automation systems, and scalable backend APIs.

Experienced in Node.js, Express.js, React.js, MongoDB, PostgreSQL, Docker, AWS S3, RBAC systems, cron-based workflows, payment integrations, and operational automation. Built and maintained multi-role platforms supporting subscriptions, recurring deliveries, document automation, AI-powered modules, and Agile collaboration workflows.

WORK EXPERIENCE

Software Developer — Morpheo Digital, Noida

May 2025 – Present

- Architected and developed backend systems for DairyOnDoor, a subscription-based milk delivery platform with vendor, consumer, and admin workflows.
 - Built cron-driven recurring order and delivery scheduling systems supporting subscription lifecycle management and automated daily processing.
 - Developed RBAC architecture, Razorpay payment workflows, AWS S3 integrations, and Firebase push notification infrastructure.
 - Built ePatrachar, a document automation platform that dynamically extracts fields from PDF/DOC templates and auto-generates government forms.
 - Developed a Jira-inspired Agile collaboration MVP featuring issue tracking, sprint workflows, backlog management, and role-based collaboration systems.
-

SDE-I — Applore Technologies, Noida

May 2024 – May 2025

- Developed full-stack modules across multiple MERN and Nest.js applications.

- Built AI-assisted diet and wellness modules for GutBuddy using OpenAI APIs for personalized meal plans and yoga workflows.
 - Contributed to FirstShot, an influencer collaboration platform supporting multi-role onboarding and collaboration workflows.
 - Delivered end-to-end features from backend API development to frontend integration, deployment, and production support.
-

Full Stack Developer — EightyFive Technologies Pvt. Ltd., Goa

Jul 2023 – May 2024

- Transitioned from frontend React.js development into backend-focused engineering with Node.js and Express.js.
 - Built backend APIs and admin dashboards for cryptocurrency and real-estate platforms.
 - Developed CRUD workflows, authentication modules, and operational admin systems using React.js, Node.js, Express.js, and MongoDB.
-

SELECTED PROJECTS

DairyOnDoor — Subscription-commerce milk delivery platform with recurring delivery orchestration, RBAC workflows, Razorpay integration, and cron-based automation.

ePatrachar — Document automation platform supporting dynamic PDF/DOC field extraction and government form generation workflows.

Agile MVP — Jira-inspired Agile collaboration system with issue tracking, sprint workflows, backlog management, and RBAC architecture.

TECHNICAL SKILLS

Backend: Node.js, Express.js, Nest.js, REST APIs, WebSockets, Cron Jobs, RBAC, JWT Authentication, Microservices

Frontend: React.js, Next.js, Redux, Context API, HTML5, CSS3, Material-UI, React-Bootstrap

Databases: MongoDB, PostgreSQL, Prisma ORM, Mongoose, Redis, MySQL (Basic)

Cloud & DevOps: Docker, AWS S3, EC2, CloudFront, Firebase Cloud Messaging (FCM), Nginx, PM2, GitHub Actions

Integrations & Tools: Razorpay, OpenAI APIs, Groq APIs, OAuth 2.0, Twilio, Nodemailer, Google Maps API, PDFKit, ExcelJS, MSG91

EDUCATION

PG-DAC, C-DAC MET Mumbai (2022–2023)

B.E. Mining Engineering, Goa College of Engineering (2015–2018)
